

LOW TEMP RINSE ADDITIVE

PRODUCT DESCRIPTION

A competitively priced rinse additive that is designed to handle most water conditions. It can be used in all liquid proportioning equipment for both high and low temperature dish machines. It lowers the surface tension of the water, causing it to run off the tableware without spotting. Tableware will glisten.

USE DIRECTIONS

A rinse injector is required.

- 1.
- 2.

Via dispensing system, insert pickup tube into the shipping container. Product is then pumped directly into the final rinse as needed.
Can be fed into the final system through all standard rinse injecting systems.
